To Whom It May Concern,

Cody Builder's Supply provided miscellaneous metals for our Virginia Initiative Plant Nutrient Reduction Upgrade Project for Hampton Roads Sanitation District in Norfolk, VA. Throughout the submittal process, Cody Builder's Supply was actively involved in resolving issues before they became installation problems in the field. Their shop drawings were provided in a timely manner and were accurate.

The material provided included stainless steel, aluminum, and steel fabrications. Minimal fabrication issues occurred, and the quality of the fabrications and welding was impressive.

Cody Builders strived to create a good working relationship throughout this five-year long project and provided assistance in the field even after their retainage was received.

MEB welcomes the chance to work with Cody Builders in on future projects and would recommend them to other General Contractors as a quality supplier.

Sincerely,

**Tim Griffin**
