To Whom It May Concern:

MWH Constructors, Inc. is pleased to offer this letter as a recommendation of Cody Builders Supply, Inc. We have had the opportunity to work with them on a wastewater treatment plant expansion project where Cody Builders provided fabricated metals (included fabricated building structures), fiberglass reinforced plastic materials, and roof/vault hatches.

Cody Builders provided all materials in a timely manner which allowed for construction to progress as scheduled. Furthermore, they provided professional level shop drawings for review and prompt responses to engineering review of drawings.

We welcome the opportunity to work with Cody Builders on future construction projects.

Sincerely,
