Reference: COULMBIA UNIVERSITY- MANHATTANVILLE DEVOLPMENT PHASE 2-EXCAVATION SUPPORT

To whom it may concern,

I am writing this letter to recommend Cody Builders Supply, Inc for their work on the Columbia University- Manhattanville Development Phase 2 Project in New York, New York. Cody Builders was responsible for providing the fabricated steel corner bracing to support the shoring during excavation.

This project was on a very tight timetable and Cody Builders was able to meet those scheduling demands and adjust as needed throughout the project as priorities shifted. They were quick to respond to issues as they arose in the field, were knowledgeable and helpful in finding solutions and made necessary modifications so as to continue the progress of the work and maintain the schedule.

Cody Builders demonstrated a positive and cooperative attitude, while delivering a high-quality product in a timely manner throughout the duration of the Project and I would definitely recommend them for future projects.
